Log in CheckPoint VPN

MFA prerequisite

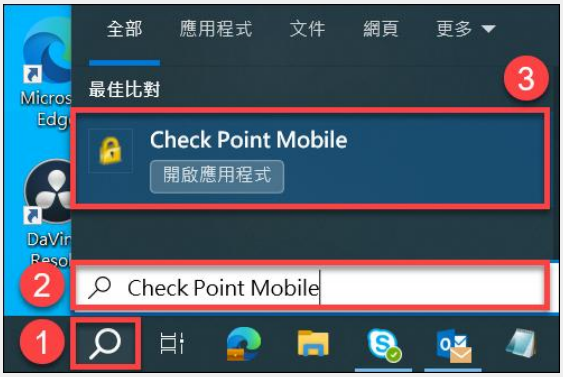

Before logging into CheckPoint VPN, be sure to enable MFA settings. For details, please refer to How to enable MFA.

NOTE — Finding Check Point Mobile

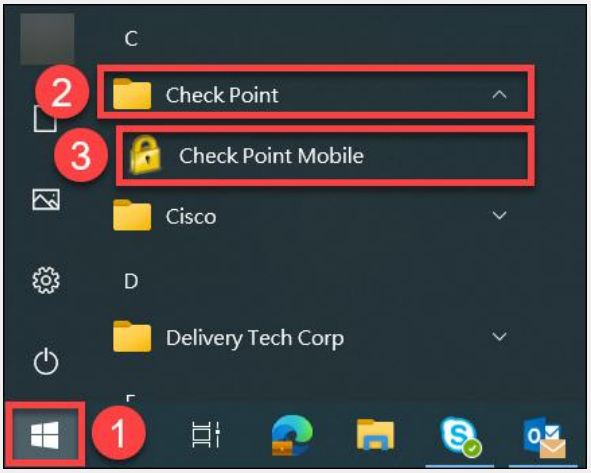

If you do not find the icon of CheckPoint, please search for **Check Point Mobile**. And then start step 1.

Windows 10

Please search **Check Point Mobile** in Windows.

Or you can click the button at the lower left corner and look for **Check Point**, and then click **Check Point Mobile**.

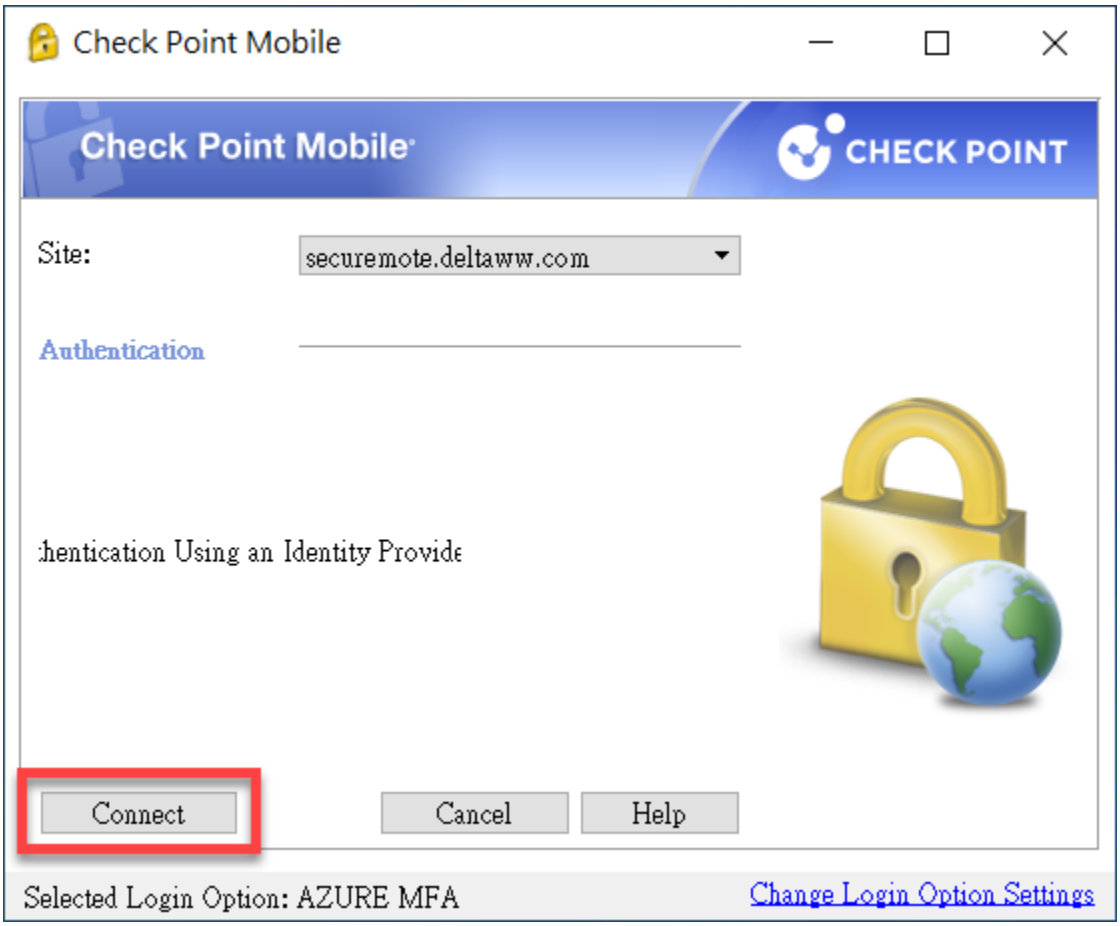

Windows 11

Please search **Check Point Mobile** in Windows.

1. Once you're in CheckPoint, click on connect.

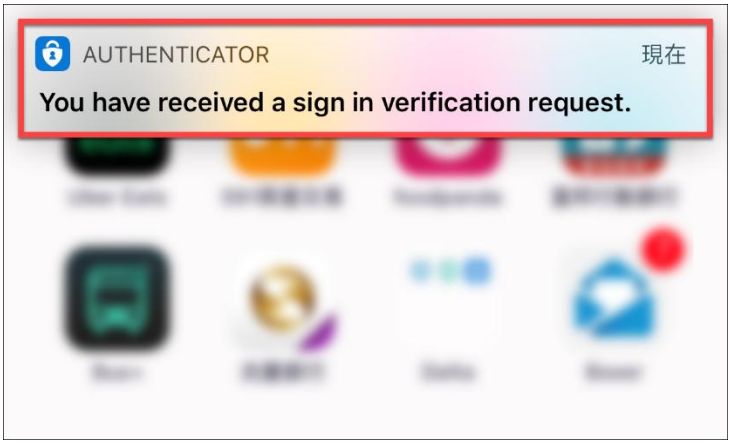

2. If the following window pops up, please enter your Delta domain account & password (@deltaww.com must be added) and click **Sign in**.

3. A set of numbers will appear on the screen, and MFA verification is required. Please follow the steps below.

a. The following message will automatically pop-up on your phone. Please click the message.

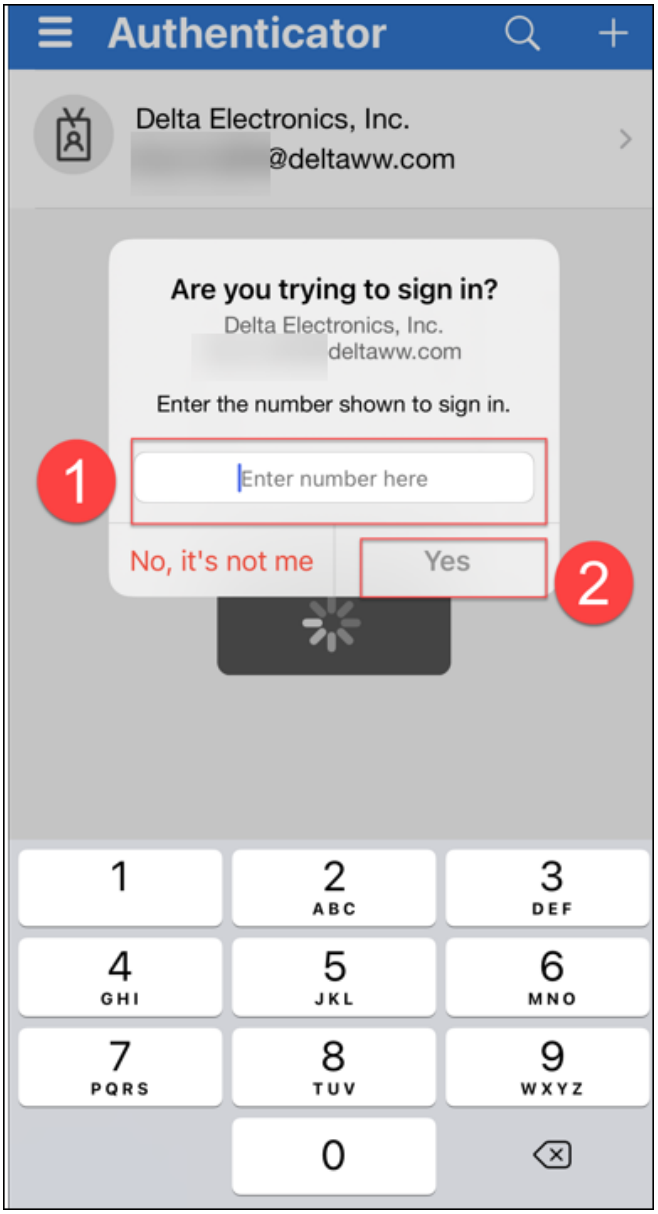

NOTE — Authenticator notifications

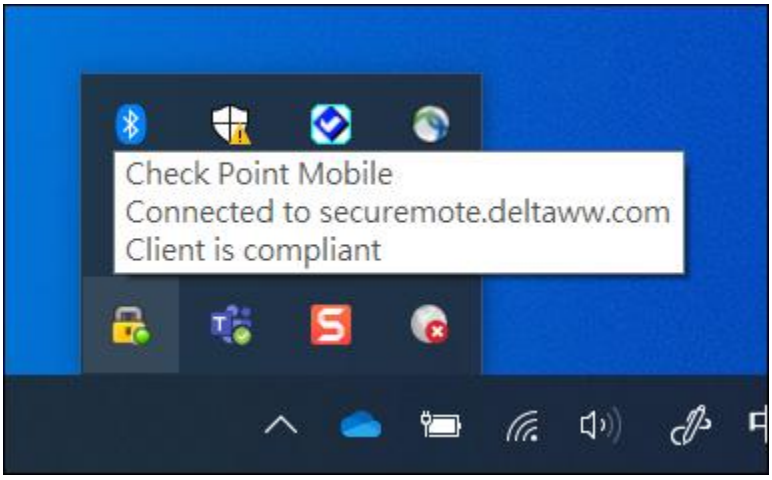

If the notification message doesn't automatically pop-up on your phone, it is probably because your phone has blocked **Authenticator** from sending notifications. You can click **Settings** > **Notifications** on your phone, select **Authenticator**, and make sure that **Show notifications** or **Allow Notifications** is on。

If you don't want to enable notifications, you can also directly click the App icon of **Authenticator** to enter the application.

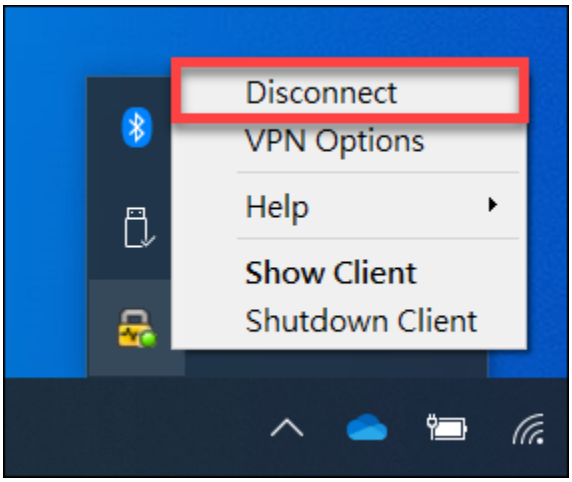

b. Enter the number just shown on the computer screen and click **Yes**.

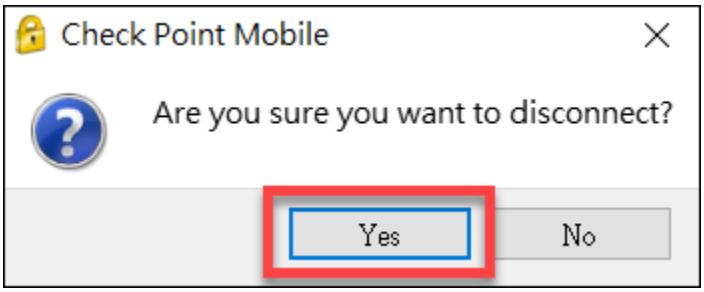

4. If the following icon appears, the verification is successful (Connected is displayed).

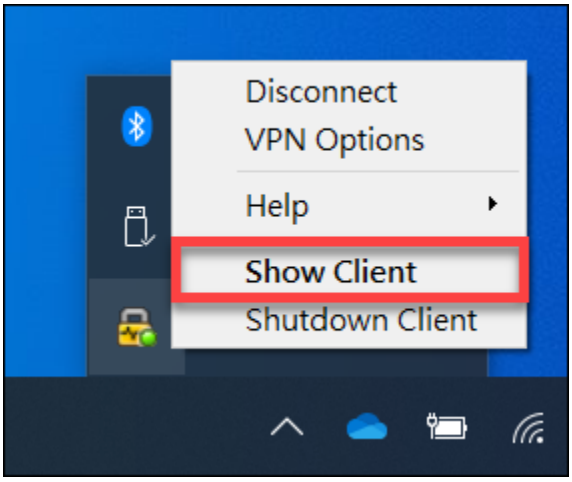

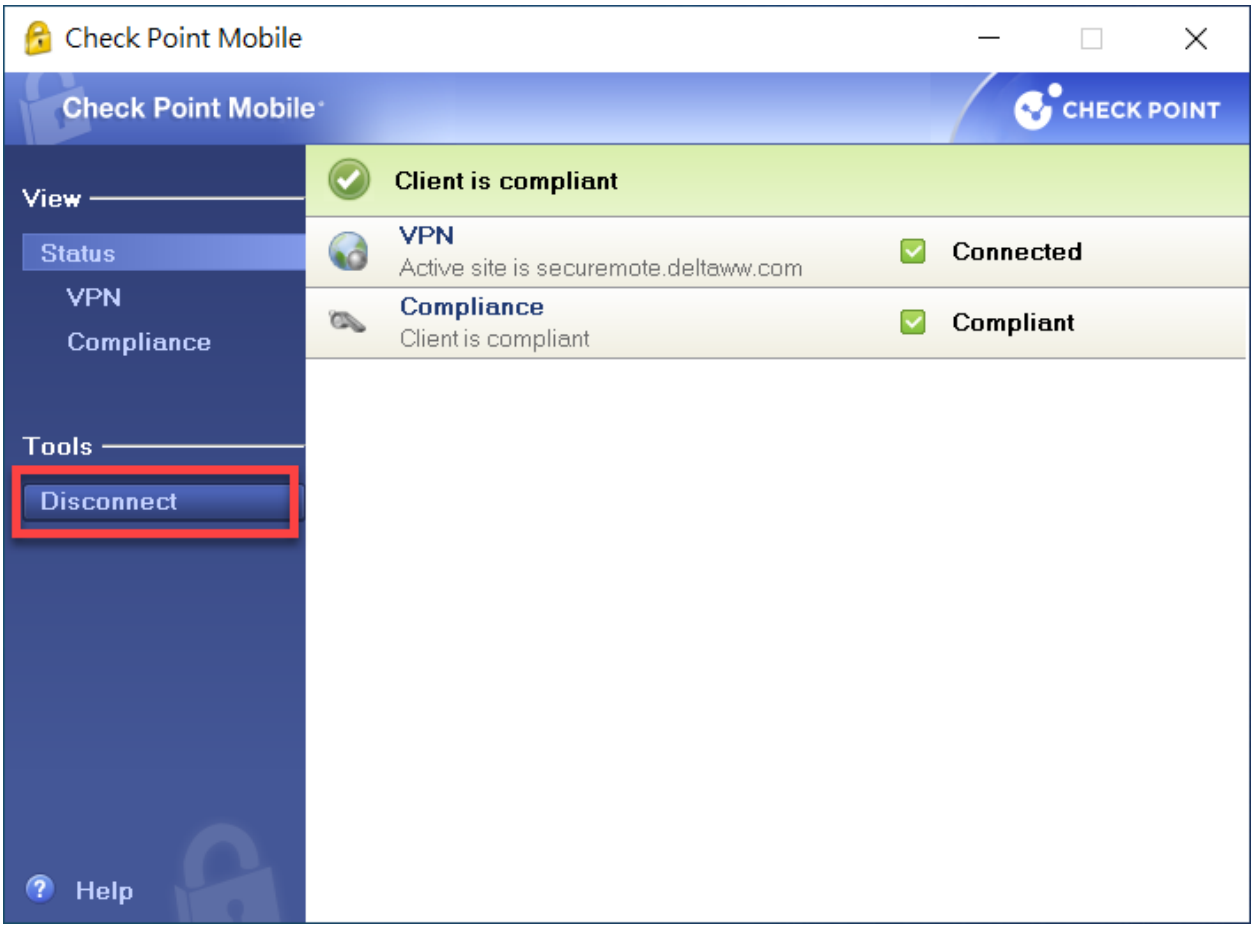

5. To disconnect, right-click the CheckPoint icon > **Disconnect** > **Yes**.

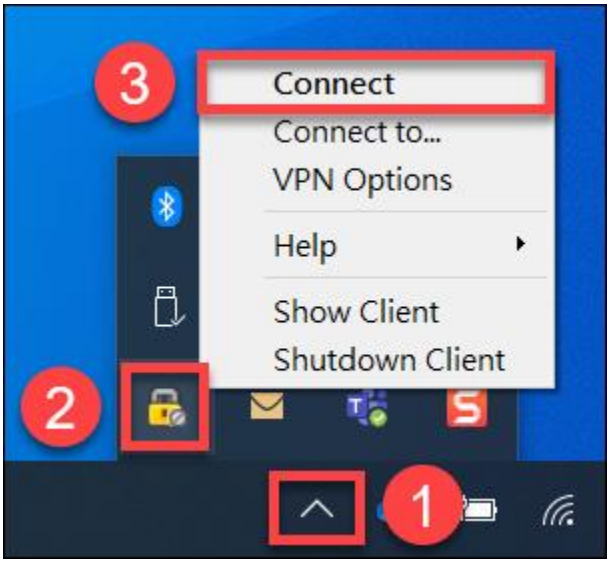

6. Or right-click the CheckPoint icon > **Show Client**, then click **Disconnect** > **Yes** in the pop-up window.

7. When you want to log in to CheckPoint next time, please right-click the icon > **Connect**, or directly left-click the icon twice.

Then follow step 8 for MFA verification. If the following icon appears, the verification is successful (Connected is displayed).
